

REMARKS

Claims 1, 24, 45, 56, and 77 have been amended. Claims 1, 4, 7-77, 90, and 91 are thus pending in this application, with claims 1, 24, 45, 56, and 77 being independent. No new matter has been added.

In the non-final Office Action of November 26, 2008 ("Office Action"), claims 1, 4, 7-77, and 90-92 were rejected under 35 U.S.C. § 112, second paragraph; claims 1, 24, 42-45, and 77 were rejected under 35 U.S.C. § 103 based on U.S. Patent No. 7,133,900 ("Szeto") and Trillian v0.73; claims 1, 4, 7-12, 14, 15, 17, 18, 20-32, 34, 35, 37-41, 45-48, 50, 51, 53-64, 66, 67, 69, 71-77, and 90-92 were rejected under 35 U.S.C. § 103 based on U.S. Patent No. 5,880,731 ("Liles") and Trillian v0.73; claims 13, 16, 33, 36, 49, 52, 68, and 70 were rejected under 35 U.S.C. § 103 based on Liles, U.S. Patent Application Publication No. 2002/0059425 ("Belfiore"), and U.S. Patent No. 5,963,217 ("Grayson"); claims 13, 16, 33, 36, 49, and 52 were rejected under 35 U.S.C. § 103 based on Szeto, Belfiore, and Grayson; claims 19 and 82 were rejected under 35 U.S.C. § 103 based on Liles, Belfiore, and U.S. Patent No. 5,745,556 ("Ronen"); and claim 65 was rejected under 35 U.S.C. § 103 based on Liles, Belfiore, and U.S. Patent No. 5,944,780 ("Chase"). Applicant submits that these rejections should be withdrawn for at least the following reasons.

Section 112, Second Paragraph, Rejection

Claims 1, 4, 7-77, and 90-92 were rejected under section 112, second paragraph, as being indefinite for failing to clearly distinguish the terms "instant messaging" and "chat." *See* Office Action, p. 28. On page 28, the Office Action asserts that "Applicant has not provided a concrete definition of the differences between a 'chat' and an 'instant messaging, non-chat' context." Applicant respectfully disagrees with this assessment. Nevertheless, to advance prosecution, the Applicant has amended independent claims 1, 24, 45, 56, and 77, as suggested by the Examiner, to more positively claim "what makes an 'instant messaging' context different from a 'chat' context." *See* Office Action, p. 29. Therefore, Applicant requests withdrawal of the section 112, second paragraph, rejection.

Section 103 rejection based on Szeto and Trillian v0.73

Szeto and Trillian v0.73 do not support a conclusion of obviousness with respect to claims 1, 24, 42-45, and 77.

Amended independent claim 1 recites, among other things, the following feature:

a module for mapping the accessed personalization item selected in the non-chat, instant messaging context, which involves one-to-one communications, to a chat context, which involves one-to-many communications, the mapping being based on definitions of personalization items in the chat context and definitions of the personalization items in the non-chat, instant messaging context, wherein at least one of the definitions of personalization items in the chat context differing from at least one of the corresponding definitions of the personalization items in the non-chat, instant messaging context.

Szeto and Trillian v0.73, whether taken alone or in proper combination, fail to disclose or suggest at least this feature.

Szeto discloses a method for sharing an instant messaging environment where an environment selected by a participant is passed to the other participants in the instant messaging system through the use of environment identifiers. See Szeto, Abstract and col. 7, lines 17-37. As the Office Action acknowledges, Szeto does not disclose or suggest at least the “module for mapping” noted above. See Office Action, p. 3.

Recognizing deficiencies in Szeto, the Office Action turns to Trillian v0.73. On page 3, the Office Action asserts that “[t]he general concept of migrating items from one context to another via mapping is well known in the art as taught by Trillian.” However, the screenshot of Trillian v0.73 provided with the Office Action only shows that one “Buddy Icon” may be used “for all connections.” However, it is unclear what constitutes “all connections.” At best, the Trillian v0.73 screenshot teaches that a “buddy icon” can be shared across multiple applications (e.g. AIM and ICQ) within the same non-chat, instant message class, not from one type of application to another type of application.

Conversely, the “module for mapping” feature of claim 1 maps personalization items from one type of application, a non-chat, one-to-one, instant messaging context, to another type of application, a one-to-many, chat context. Since these two types of applications are different,

Trillian v0.73 cannot disclose or anticipate the “module for mapping” in independent claim 1 and thus fails to cure the deficiencies of Szeto.

For at least the foregoing reasons, Szeto and Trillian v0.73—taken alone or in any proper combination—fail to disclose or suggest each and every element recited in independent claim 1. The section 103 rejection of claim 1 and its dependent claims should accordingly be withdrawn.

Amended independent claim 24 and 45 recite, among other things, a computer implemented method and computer readable storage device, respectively, including:

storing, in a memory accessible to a chat host system, a mapping of definitions of the personalization items in a chat context, which involves one-to-many communications, to definitions of the personalization items in the non-chat, instant messaging context, which involves one-to-one communications, wherein at least one of the definitions of personalization items in the chat context differing from at least one of the corresponding definitions of the personalization items in the non-chat, instant messaging context.

Applicant submits that this feature of claims 24 and 45 is not disclosed or suggested by Szeto and Belfiore for at least similar reasons, as discussed above. Therefore, the section 103 rejection of claims 24 and 45 and their dependent claims based on Szeto and Belfiore should be withdrawn for at least reasons similar to those presented above in connection with claim 1.

Similarly, amended independent claim 77 recites, among other things, a computer implemented method including:

mapping the stored personalization item from a non-chat, instant messaging context, which involves one-to-one communications, to a chat context, which involves one-to-many communications, the stored personalization item having a meaning in the non-chat, instant messaging context that is different from a meaning in the chat context.

Applicant submits that this feature of claim 77 is not disclosed or suggested by Szeto and Belfiore for at least similar reasons, as discussed above. Therefore, the section 103 rejection of claim 77 and its dependent claims based on Szeto and Belfiore should be withdrawn for at least reasons similar to those presented above in connection with claim 1.

Section 103 rejection based on Liles and Trillian v0.73

Liles and Trillian v0.73 do not support a conclusion of obviousness with respect to claims 1, 4, 7-12, 14, 15, 17, 18, 20-32, 34, 35, 37-41, 45-48, 50, 51, 53-64, 66, 67, 69, 71-77, and 90-92. Liles discloses a system for representing participants in a chat session with avatars that may be animated. *See* Szeto, Abstract. As the Office Action acknowledges, Liles does not disclose or suggest at least the “module for mapping” noted above. *See* Office Action, p. 8. Rather, the Office Action turns to Trillian v0.73 to cure this deficiency. As discussed above, however, Trillian v0.73 fails to describe or suggested the above-discussed features of independent claims 1, 24, 45, 56, and 77. Therefore, the section 103 rejection of claims 1, 24, 45, 56, and 77 and their dependent claims should be withdrawn.

Section 103 rejection based on Liles, Belfiore, and Grayson

The rejection of claims 13, 16, 33, 36, 49, 52, 68, and 70 based on Liles, Belfiore, and Grayson is improper, because claims 13, 16, 33, 36, 49, 52, 68, and 70 are dependent upon claims 1, 25, and 45, whose rejection is based on Liles and Trillian v0.73, not Belfiore. Applicants, therefore, respectfully request either (i) withdrawal of the section 103 rejection or (ii) a completed rejection curing the deficiencies of the asserted section 103 rejection.

Section 103 rejection based on Szeto, Belfiore, and Grayson

The rejection of claims 13, 16, 33, 36, 49, and 52 based on Szeto, Belfiore, and Grayson is improper, because claims 13, 16, 33, 36, 49, and 52 are dependent upon claims 1, 25, and 45, whose rejection is based on Liles and Trillian v0.73, not Belfiore. Applicants, therefore, respectfully request either (i) withdrawal of the section 103 rejection or (ii) a completed rejection curing the deficiencies of the asserted section 103 rejection.

Section 103 rejection based on Liles, Belfiore, and Ronen

The rejection of claims 19 and 82 based on Liles, Belfiore, and Ronen is improper, because claim 82 was previously cancelled and claim 19 is dependent upon claim 1, whose rejection is based on Liles and Trillian v0.73, not Belfiore. Applicants, therefore, respectfully

request either (i) withdrawal of the section 103 rejection or (ii) a completed rejection curing the deficiencies of the asserted section 103 rejection.

Section 103 rejection based on Liles, Belfiore, and Chase

The rejection of claim 65 based on Liles, Belfiore, and Chase is improper, because claim 65 is dependent upon claim 56, whose rejection is based on Liles and Trillian v0.73, not Belfiore. Applicants, therefore, respectfully request either (i) withdrawal of the section 103 rejection or (ii) a completed rejection curing the deficiencies of the asserted section 103 rejection.

Conclusion

It is requested that the Examiner reconsider the application in view of the remarks and timely allow the pending claims.

It is believed that all pending issues in the outstanding Office Action have been addressed by this paper. The Office Action, however, contains a number of statements reflecting characterizations of the related art and the claims. Whether or not any such statement is identified herein does not constitute an automatic subscription to any statement or characterization in the Office Action. In addition, there may be reasons for patentability of any or all pending or other claims that have not been expressed above.

If there are any questions regarding this paper or the application generally, a telephone call to the undersigned would be appreciated since this may expedite prosecution of the application.

It is hereby petitioned that the period for response to the Office Action be extended for one (1) month. The Petition for Extension of Time fee of \$130.00 is being paid concurrently herewith on the Electronic Filing System (EFS) by way of Deposit Account authorization. Please apply any required charges or credits to Deposit Account No. 06-1050.
